

Recombinant human CNT-proBNP with a fusion protein

Description

| | |
|--------------------------|--|
| Product name | Recombinant human CNT-proBNP with a fusion protein |
| Catalog# | ABT-9097 |
| Known as | Natriuretic peptides B |
| Expression system | E.coli |
| Tags | His tag C-terminus |

Specifications

| | |
|-----------------|-------------------------------|
| SDS-PAGE | 27.7 kDa, reducing conditions |
| Purity | >95% SDS-PAGE |
| Form | Lyophilized powder |

Stability and Storage

| | |
|---------------------|---|
| Storage | Store at -20 ~ -80°C, avoid repeated freeze/ thaw cycle |
| Stability | Aliquot and store at -20°C for 12 months. |
| Constituents | 0.22 µm filtered solution in Tris-HCl, pH8.0. |

General information

| | |
|-----------------|--|
| Function | May affect cardio-renal homeostasis. Able to promote the production of cGMP although its potency is very low compared to brain natriuretic peptide 32. |
|-----------------|--|

Images

Canis lupus familiaris CNT-proBNP with a fusion protein on SDS-PAGE under reducing condition(R). The gel was visualized by Coomassie® Blue Staining. The purity of the protein is greater than 95%.
